What this means (factual, no plan yet)

- Two eras: 2023-2024 random/meme shorts seeding (views 20-60 typical, outliers to 3.6K) -> 2025-2026 focused IP: Attack series + gaming longs + reactions.
- Last 30 days: 7 uploads (3 longs 15-34 min + 4 shorts). Longs 3-185 views; shorts 14-80 views except Idk what is gonna happen (1.1K, 1 mo ago).
- Best watch-time assets now are longs (99 nights 32:16, capybara 23:04); best reach assets are old shorts (castrol, Fall from the sky, Llamapie2928).

4. Notes & limits

Sources: uploads playlist UUAgk4f96GrNCEHC9mIPRJVg (55 lockups incl. 1 unavailable), header (61 subs / 54 videos label), Shorts tab (44 shortsLockup IDs), Videos tab. Fetched Oct 2026 via public web endpoints.

Counts: header says 54 videos but playlist yields 55 entries (54 playable + 1 unavailable Today is my freaking birthday, 2y ago). Use 54 playable as working total; discrepancy is likely caching/private status.

Views like 1.1K/3.6K are YouTube abbreviations, not exact. Ages like 1mo ago are relative.

Not a science channel: name is legacy/misleading. Do not pitch as educational science; audience signals are gaming, original animation/skits, reactions, memes.

Next step (awaiting your brief): goal-gap to 100 subs (+39), and monetisation prerequisites (1,000 subs + 4,000 watch hours or 10M Shorts views) - needs a content + posting plan. Tell me what to do next.
