Trend Analysis
Oct 2026

Shitpost-first / informal only | Hates: Brainrot + Verity (excluded)

Goal: 100 subs this month (61 now, +39) -> monetisation later

RESULT: 1 HUMAN video + 2 MACHINE / ANIMATOR videos - only 3, to ship before trends die

This file = complete trend summary (videos + trends observed Oct 1-12, 2026) + 3 picked ideas with scripts. Why only 3: Shorts trends live 7-21 days. Halloween dies Nov 1. Mandem / Buggin peaked Oct 1-7. Shipping 3 fast beats planning 10 slow.

1. Complete trend analysis (Oct 1-12, 2026)

Sources: TikTok Creative Center trackers, YT Shorts reports Oct 2026, Roblox charts Oct 12, Fortnite Fortnitemares schedule, meme DB. All public. Lifespan notes included.

A. Halloween reveals (PEAK NOW, dies Nov 1)

Ramalama Costume Walk: low shoes walk -> lift reveal on R. Murphy Ramalama (Bang Bang). 430.7K videos on sound (Oct 5), ~50.5M views on 6 vids Sep 29-Oct 4. 7-15s, no talking.
Pumpkin Head Illusion: real pumpkin near lens = friend head, friend dances. Zero edit, hocus-pocus remix.
Also: Things You Should Definitely Ghost (sheet holds signs), Be OK (happy dance + chaos caption), costume transitions (hand-swipe), pet pumpkin / hot-dog. NRF 2026: witch/vampire/Batman/Spider-Man/ghost lead; pets: pumpkin.
Window: post Oct 29-31 Fri-Sat peak. Halloween Sat this year = 2-day runway.

B. AI photo-to-video templates (PEAK NOW, 7-14 day cycle)

Formula: 1-2 photos -> finished video, CapCut / Higgsfield Genjutsu. No filming.
Rumpelstiltskin tiptoe (Tip Toe Wing In My Jawwdinz): 900K in 1 week, 65K-follower repost account in days. Swap imp for anyone.
Burning Bridges (Drake dinner): #burningbridgesai 748 vids / 2M views Oct 7-10. 1 photo = you host party. 15-25s.
Alors on danse (keyboard + hype man), Gas Station Dance (3-photo group), APT pink studio, Toc Toc line, Smalltown Boy scream duo, Hotel Lobby Migos, AI Arrest Filter (not bro getting arrested again). 59 posts/52 creators in 72h Oct 1.
Cost: $2-7 per 15s (Higgsfield) or free CapCut. Must label AI. Original ranks higher since Oct 1 YT change.

C. Dance / sound memes (PEAK / EARLY FADE)

Mandem Style (Luke Day drill Gangnam remix ching dat mandem style): Sasuke shrug sync. Template 2.3M views 1st week (Sep 26), 650K 2nd edit, 800K cooking gag Oct 2. Accuracy reenactments 230K.
Baby You Buggin (Khantrast Genius Sep 30): 1.2M / 1M / 335K Oct 3-5. POV caption meme.
Six Seven funk (Seis Sete): 75M single (J-Hope). Slayyyter posing dances = equal to choreo now.
Rule: 5-11s steady views, ~60s breakout watch-time. Use trending sound in first 2s (+21% reach).

D. Gaming events (EVERGREEN + SEASONAL BOOST)

Fortnitemares Oct 1-Nov 1: FNAF Day 1, Freddy Krueger boss Day 2, Black Clover, Hollow Knight, Reload Nightmare Island Oct 8, 99 Nights Deer skin Oct 10, Beetlejuice/Hazbin/Purge/Slenderman rolling. 26 Nitemare quests -> free skin.
Roblox Oct 12: Steal An Egg 1.9M, Brookhaven, 99 Nights in the Forest 347K players / 30B visits / 90% likes, updated Oct 7. Adopt Me Halloween 252K, Dandy World 94K.
Wayla tie: his 99 nights again 32:16 (185 views) is his top recent long. 99 Nights x Fortnite cross = perfect bridge.

E. Anime edits + comedy containers (STEADY)

Sasuke / Naruto vs Sasuke rapid-cut edits, Minato edits (128K likes). POV yellow-text relationships, I asked ChatGPT to lie (horse neigh), ceiling-fan wipe outfits, geometric horror (one strong joke), StudyTok 5-sec homework gag.
Avoid per Wayla: Folk Valley / Only-in-Ohio absurd + Steal a Brainrot + Italian brainrot = BRAINROT. Bunker vs Verity / Crack Verity / verity-explainers = VERITY. All excluded from ideas below.

2. The 3 picks - 1 human, 2 machine

Picked for: <1hr work, fits shitpost + Attack IP + Halloween + 99 Nights, no Brainrot/Verity, loopable, postable by Oct 31.

IDEA 1 - HUMAN: Pumpkin Head Attack (phone, friend, pumpkin)

Concept: Attack on All Wayla Halloween special as Pumpkin Head Illusion. You hold real pumpkin near lens, friend (or MuhahaBoston) 3m behind dances as Attack character. 0:12, no edit.

Hook 0-1s: pumpkin fills frame + on-screen: attack on all wayla 13.

Shots: (1) 0-3s pumpkin close, friend hidden (2) 3-10s friend flails / moonwalk (Wayla MJ tie) (3) 10-12s drop pumpkin -> reveal face + Attack roar.

Sound: hocus-pocus spooky remix (same as trend) OR Ramalama whisper. Film golden hour.

Title: attack on all wayla 13 pumpkin head #halloween #attackonallwayla #shorts

Why Wayla: uses 10-ep core IP (18-32 views base) + #1 Halloween format (zero edit) + MJ dance callback. Human-only charm = original boost Oct 1 algo.

Ship: film 20 min, post Oct 29-31 7pm. Success = 3x median shorts views (~60+) + 2 subs. If pops, part 2 with Backrooms skin.

IDEA 2 - MACHINE/ANIMATOR: Mandem Attack shrug loop (no camera)

Concept: Animator redraws 1 Attack on All Wayla character doing Sasuke Mandem shrug, 3 frames, beat-synced to ching dat mandem style. 0:08 loop. No human filming.

Spec for animator/CapCut: 9:16, 3-frame shoulder bounce on each syllable, white flash on drop (like Zany Emote burst), captions: ching dat mandem style. Export perfect loop (last frame = first).

Hook: first shrug on beat 0.5s. Sound: Mandem Style original (Luke Day). Use Sound -> Use this sound.

Title: attack on all wayla does mandem style #mandemstyle #sasuke #animeedit #shorts

Why Wayla: anime-edit trend (2.3M template) + his IP, no filming, repostable as accuracy reenactment later with human. Animator 1-2h. Post Oct 15-25 before sound fades.

Ship: send animator 1 front PNG of Attack character + this spec. Success = loop rate >120% avg view duration, 5 subs from anime crowd.

IDEA 3 - MACHINE/AI: Burning Bridges Attack dinner (1 photo)

Concept: AI template puts Wayla (+MuhahaBoston) as hosts of Drake Burning Bridges dinner, guests = Attack on All Wayla cast. 0:15. 1 photo only.

Steps (agency does it): 1 front photo Wayla, Higgsfield/CapCut Burning Bridges template, prompt: replace host, keep room/chandeliers/wave, Halloween horror guests. Enable TikTok/YT AI label. 10-min render, $0-7.

Hook: Where she at? hand-over-eyes 0-2s. Caption: me at my birthday dinner after burning every bridge.

Title: attack crew at drake dinner where she at #burningbridgesai #halloween #shorts

Why Wayla: #burningbridgesai 2M/3 days Oct 7-10 = still rising Oct 12, two-person = tags Muhaha = subs, horror guests = Fortnitemares tie, zero shoot. Fits shitpost + collab history (chess 9:22).

Ship: render 2 variants (Wayla solo, Wayla+Muhaha), post better one Oct 18-28. Success = comments naming guests + cross-post to community. If tool blocks copyright, fallback: AI Arrest Filter with Attack villain (same 1-photo flow).

3. Posting rules (so trends don't fall off)

1) Order: HUMAN pumpkin (Oct 29-31) -> MACHINE mandem (ASAP, sound fading) -> MACHINE bridges (Oct 18-28). Actually render machines NOW, stagger posts.
2) Length: 7-15s Halloween/AI, 8-20s dance. Captions on (80% viral use them), on-screen hook text (1.79x views), 10-25 cuts/min.
3) Sound: Use This Sound from trend, first 2s. 11am / 7pm local, 1/day max, don't post over a surging video.
4) No-no: no Brainrot audio/game, no Verity game/explainer, no re-upload w/o commentary (Oct 1 demotion), no delete-repost (spam), label AI.
5) Goal math: 61 -> 100 = +39. Collab tags (Muhaha) + 99 Nights/Fortnite search + Halloween browse = 3 discovery pools. Track chose-to-view in Studio, double down on winner with 3-10 hook variants.

Excluded deliberately: Rumpelstiltskin (needs 2-photo + creep fatigue), Folk Valley (brainrot-adjacent), Steal a Brainrot game (hate), Verity games, long vlogs (too slow for trend window). Save for Nov.
